PROJECT

Expense Tracker – Cross-Platform Mobile App *Flutter · Firebase · Hive · Clean Architecture*

Personal Project | github.com/Azhayon

- Built a full-featured offline-first personal finance app using Flutter, Dart, and Clean Architecture (Presentation, Domain, Data layers). User data is isolated in Firestore by unique ID with security rules enforced.
- Implemented Firebase Authentication, real-time cloud sync (Firestore), expense/income tracking across 8 categories and 7 income sources, and per-category monthly budget limits with overspend alerts.
- Delivered analytics screen with pie and bar charts (fl_chart), multi-currency support (10 currencies), monthly PDF & CSV export, light/dark mode, and a 3-screen animated onboarding flow.
- Managed state with flutter_bloc, dependency injection with get_it, and wrote unit tests using bloc_test and mocktail.
